

Minutes of Meeting

Date: 25 September 2026

Meeting: System Demo & Module Discussion

Participants: Retrod Team & Excel Team

Discussion

The Retrod Team conducted a complete demonstration of the system to the Excel Team. During the meeting, the Retrod Team explained and demonstrated all the major modules available in the system, one by one, along with their respective workflows and functionalities.

In addition to the all modules, the Retrod Team specifically demonstrated the **question paper PDF upload process** and explained the required question paper format.

The **Bulk Section Upload** module was also demonstrated, including the process of uploading section details in bulk.

The **Assign Teacher** module was explained, including the process of assigning teachers to classes/sections and the workflow to be followed when a teacher applies for leave.

The **Timetable functionality** was demonstrated for both students and teachers. The Retrod Team explained how students can view their respective class timetable and how teachers can view their scheduled classes, including the relevant class and section, through the Teacher Calendar.

The **Live Class/Online Class** functionality was also demonstrated to explain how teachers can conduct classes online.

Action Items / Next Steps

- The **Retrod Team** will share the required **question paper format PDF** with the Excel Team.
- The **Excel Team** will share the required **banner image** with the Retrod Team for use in the system.
- The **Excel Team** agreed to test all the demonstrated modules on the **test server for one week**.
- During the testing period, the Excel Team will verify the system functionality and share any issues, observations, feedback, or required changes with the Retrod Team.
- The Retrod Team will review the feedback received from the Excel Team and take the necessary action accordingly.

Conclusion

The complete system demonstration was successfully completed by the Retrod Team. Both teams agreed to proceed with the **one-week testing phase on the test server.**
